 - (PC) QuickTime sound out setting set to "16-bit"
- Adobe Reader version 6.0 (or later)
- Adobe Flash Player version 10 (or later)

Internet Connectivity

- **Modem connection**

You can use the content on this site with either a modem or broadband Internet connection. If you are using a modem (or accessing the site in a computer lab with many other users simultaneously) you will need to select the 'low bandwidth' choice to effectively view the video.
- **Broadband connection**

You can use the content on this site with either a modem or broadband Internet connection. If you are using a cable modem, DSL, or T1 connection, you will need to select the 'high bandwidth' choice to effectively view the video.
- **Firewall, caching, and proxy servers**

If you are accessing the Internet through a firewall, or caching or proxy server, it must be configured to allow access to **www.teachscape.com** and **all**
